

Bubbly Printed Fish

Make a rainbow fish with colorful scales printed with bubble wrap!

- 1 Cut a fish shape out of your bubble wrap.

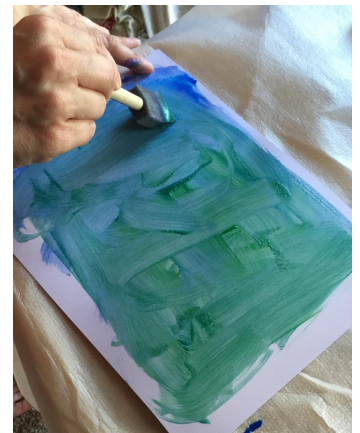

- 2 Apply paint colors of your choice to the bubbly side of your fish.

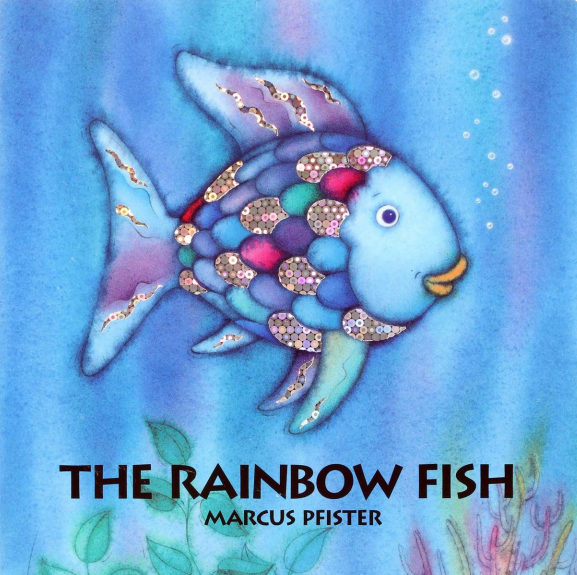

- 3 Press your painty bubble wrap fish face down onto one of your pieces of paper. Press it & smooth it down. (Try not to let it slide around.) Gently peel away the bubble wrap. Set your fish aside to dry.

- 4 With a clean brush, apply a mixture of ocean colors to your 2nd piece of paper. Set aside to dry.

Bubbly Printed Fish

- 5** When your fish print and your background are dry, cut your fish out. Plan where you'd like your Rainbow Fish to go on the background before applying glue. Press your fish down to make sure it sticks.

- 6** Create sea weed with the piece of tissue paper by rolling & crushing it with your hands. Apply plenty of glue where you'd like your sea weed to go, and stick it down, holding it for a few seconds.

- 7** Clean up your materials and work area. Admire your completed Rainbow Fish!
